

Slow down Music Using *Quick Time, Windows and iPad/iPhone*

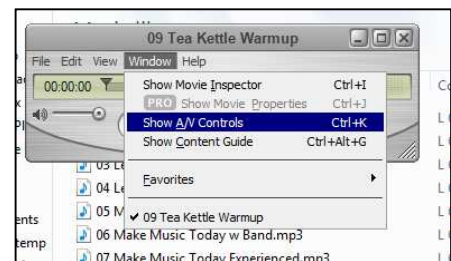

Quicktime

Load CD onto your computer and copy the songs to your music library using *iTunes*.

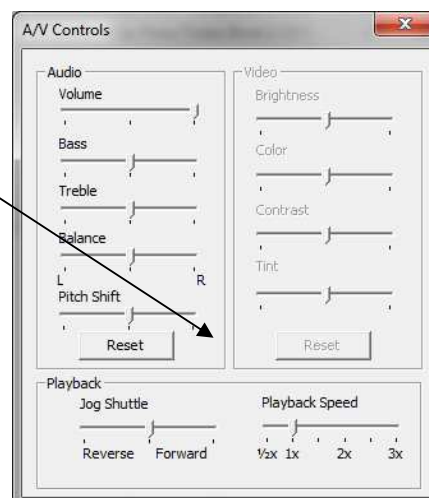

1. Open the file you created (usually found in the *Music library* on your computer). Right click on the song you wish to slow down, click on *Open with* and click on *QuickTime Player*.

2. When QuickTime player opens, click on *Window* and then *Show A/V Controls*.

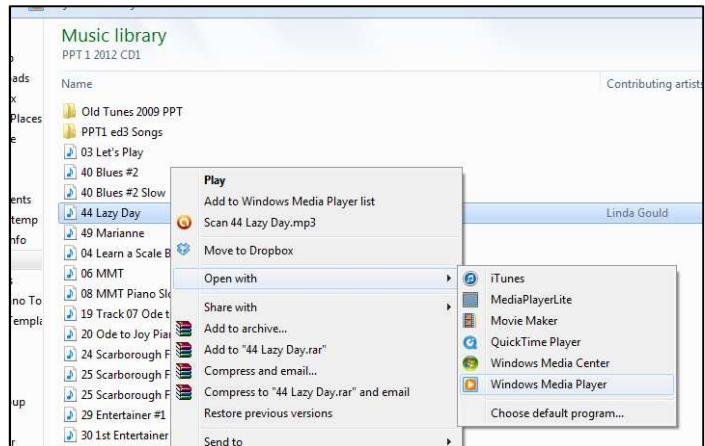

3. Select your playback speed here

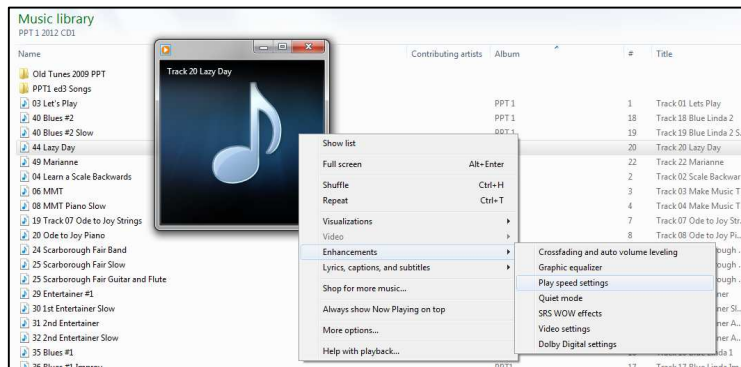

Slow Down Music With Windows

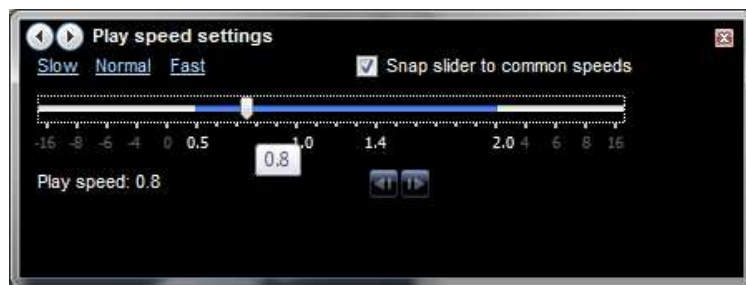

1. Open the music using Windows Media Player by clicking once on the file. Right click and select **Open With** and then **Windows Media Player**.

2. Right click on a empty space of the Windows Media Player Window and select **Enhancements** and then select **Play Speed Settings**.

3. Adjust the slider to slow down the music.

Slow down music with iphone or ipad

Download the Anytune App and follow their instructions. Website link - <http://www.anytune.us/>
